Saturday Night at the Movies: The Amazing Spider-Man (1977) - This is the pilot for the short-lived CBS series of the same name. If you're expecting plot, writing, acting, and special-effects of the caliber of the recent theatrical versions, you might as well be prepared to be severely disappointed.

Back in the '70s, following their success with The Incredible Hulk, CBS attempted to get a few other Marvel characters on the tube. Spider-Man, Dr. Strange, Captain America, Daredevil, and Thor were all tried. (The last two as attempted spinoffs from The Hulk.) Spider-Man was the only attempt to bear any real fruit. (Limited as it may have been.)
